DETAILED ACTION

Allowable Subject Matter

1. Claims 24-45 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or fairly suggest suspending retransmission of the isochronous data using the anisochronous region even though a reception error is not cleared when a time consumed by one more retransmission presumably exceeds a predetermined maximum time allowed, for each cycle, to be consumed for retransmitting the isochronous data, as specified in independent claims 24, 43, 44, and 45.

The prior art does not teach or fairly suggest that when one or more terminals, in the group, that have not successfully received the isochronous data transmitted using the isochronous region, the originating terminal is instructed to carry out multicast retransmission of the isochronous data to all of the terminals that belong to the group using anisochronous region, as specified in independent claim 32.

The prior art does not teach or fairly suggest that when one or more terminals, in the group, that have not successfully received the isochronous data transmitted using the isochronous region, the originating terminal is instructed to carry out broadcast retransmission of the isochronous data to all of the terminals using anisochronous region, as specified in independent claim 42.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
